

Installation of SysTools Migrator

You can install **SysTools Migrator** properly on your linux system by performing the following steps:

- Download **SysTools Migrator** latest version from the website.
- Right-click on the Downloaded (tar.gz) file and open with Archive Manager.
- Now, Double click on **SysTools Migrator** (systools-migrator_5.1.deb).
- Once you will double click on set up, a pop-window will occur asking for installation of SysTools Migrator. Click on Install button to begin the execution.
